

SAFE PLUS

**Antimicrobial
Virus load reduction
Barrier against liquids**

Antimicrobial treatment provides additional protection, better hygiene and reduced odor, as any adhered bacteria are deactivated and unable to grow.

Textile products tested against viruses (in accordance with ISO18184:2019) show a reduction of viral load by up to 99% on treated PES textiles.

Hypoallergenic, provides self sanitizing and germ resistance surface

For washable fabrics : lasts at least 30 gentle washes at 40° C

The fabric can be provided with certification on textile by assessed laboratory OEKO TEX / REACH

Finishing solution to protect your automotive interior and Hydrophobic barrier against water

WHY

Provide Virus load reduction and Antimicrobial action.

Dermatologically tested

High temperature stability

Do not affect key automotive expected performance

Barrier against liquids
